

GATES & FENCES

urbangroupTM
DEFINE YOUR ENVIRONMENT

URBANGROUP.CO.NZ

A grand opening.

We have over 30 years of technical know-how and service can-do making gates and fencing for New Zealanders. It's why, from the smallest residential project to the largest commercial development, we know what works both here-and-now and in the years to come. It's how, be it for homes, schools, healthcare facilities, commercial buildings, indeed any property space requiring enclosure and exactness, we provide the ultimate in security, style and durability.

Made right, right here.

We have invested considerably in manufacturing facilities at our purpose-built fabrication and powder-coating plant in Levin. Here, our state-of-the-art equipment allows us to cut, drill, weld, pre-treat and powder-coat to the highest standards. The result is seriously strong, corrosion-resistant products ready for quick, easy shipping throughout New Zealand.

Custom-made solutions.

While we stock a range of gates and fences ready for immediate dispatch, we take immense pride in our specialist custom-made solutions. We don't just take orders and tick boxes. Our customer service team is with you from start to finish to ensure the result is one that fits perfectly.

Installation control.

Our work isn't finished when fabrication is complete. When your gate or fence is ready for installation we'll arrange for an expert from our nationwide network of skilled and reliable installers. Walking through your new gate or past your new fence, you'll know every element of construction and installation has been undertaken with nothing but quality.

Service quality.

Unwavering dedication to customer service is the foundation on which our company has been built. It's been that way since we opened our doors in 1984 and it's why you'll see our name on the most innovative projects in the country. We are proud of the reputation we have built and the trust we have earned.

**Be it for a simple addition
or a grand design statement
we take pride in how our
work meets deadlines,
exceeds expectations and
ensures quality.**

* Swimming pool compliant

STYLE	Plain	Duo
HEIGHTS	1.20m	1.20m
OPENING WIDTH	0.94m	0.94m

LOUVRE GATES

The bold,
the beautiful.

With style and sophistication, Louvre gates enhance the entrances for both the contemporary and traditional home. Here, the geometric balance and bold lines of the gate provides the surrounding landscape with a striking focus point. Manufactured in aluminium to your specific requirements, our Louvre gates can be swinging or sliding, and are powder-coated in your choice of colour.

Seamless. Effortless. Flawless.

Lightweight, versatile and easy to maintain, our aluminium tongue and groove panel gates can match perfectly with wooden paling fences for a perfect final presentation. They also match with solid walls and, with inherent strength and durability won't warp or rot over time like traditional timber gates. The TGV panels on our gates can be horizontally or vertically mounted, and come fabricated, powder-coated and ready to install.

Clean. Contemporary. Creative.

Low maintenance aluminium slat gates feature clean and crisp lines. They're a cost effective alternative to timber and won't warp or rot. Custom made to order as single, double, swing or sliding and powder-coated to a colour of your choice.

Hidden strength. Obvious style.

The strong architectural design approach of our panel gate range softens the aesthetic without compromising the robust strength and security offered within. Providing full privacy and sleek style, these smart gates can perfectly complement your garage door, fencing and other features, be it for the modern home or commercial premises.

CEDAR CLAD GATES

A natural attraction.

Eye-catching sophistication is second nature to this range, the cedar cladding well regarded for its stability in all climates and, when fastened to an aluminium frame, for the lightweight durability. You can leave the cedar natural or stain it to match your home. These gates are custom made to order as single, double, swing or sliding. With cedar, the choice is yours.

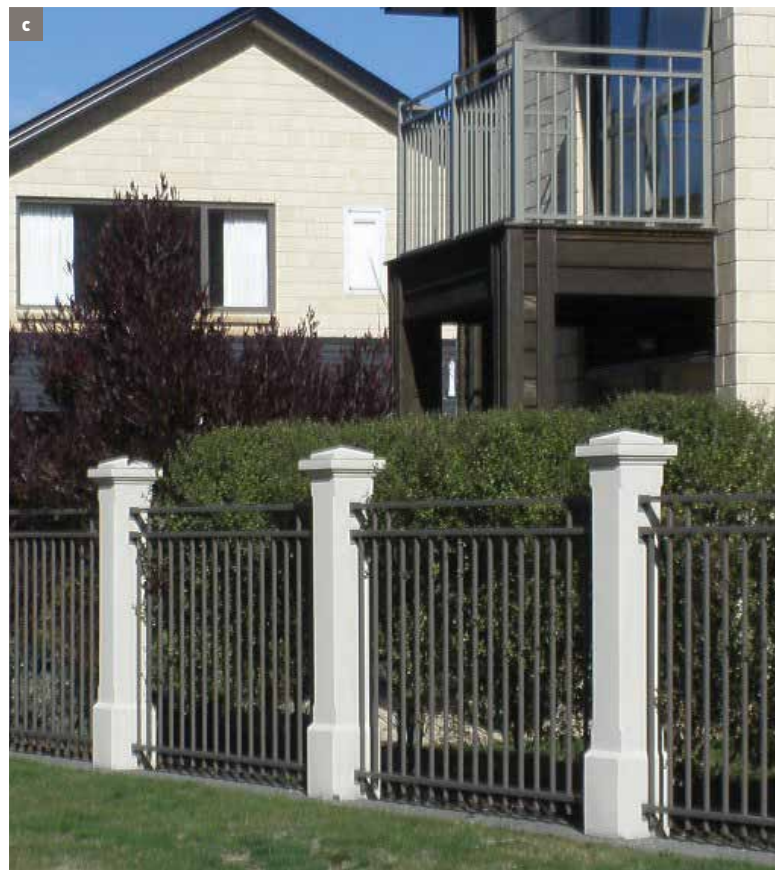

STONEWAY PILLARS

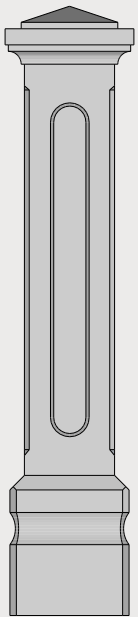

Timeless elegance.

While providing a strong design statement and a striking framing piece for fences and gates our Stoneway Pillars are lightweight to handle and designed for easy DIY installation. Simply place the pre-textured casing over the reinforcing cage and fill with concrete for the solid final pillar.

BOUNDARY FENCING

Multiple choice. Adaptable finish.

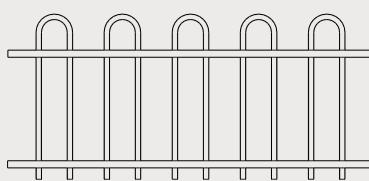

Safe, stylish and available in a huge range of colours and styles, our boundary fencing range has been carefully developed to add value and safety without compromising the view of any residential or commercial environment. All designs can be modified to suit your exact requirements and powder-coated to your chosen colour.

b

Protek: The commercial choice.

For a fast, simple and cost effective perimeter solution with serious security applications it's hard to go past our Protek range. Welded steel wire mesh panels with close centres and anti-climb spikes on top will deter intruders, or there's the option to have the panels reversed for a simple smooth top. Aesthetically simple but with high visibility strengths, this range is available in black powder-coat or galvanised finish.

Applications:

Commercial & Industrial – business parks, warehousing, restricted access areas

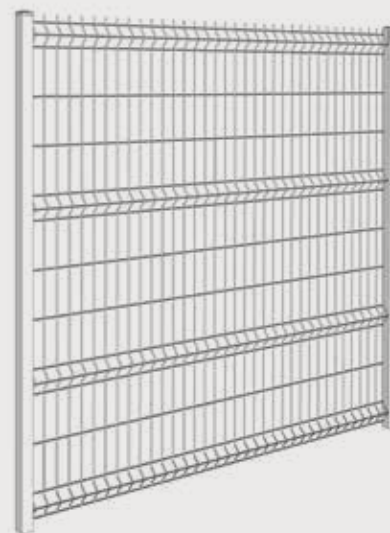

Retail – shopping centres, carparks

Recreational – sports grounds, community centres

Utilities – water treatment facilities, sub-stations

Educational – early childcare, schools, universities

Infrastructural – airports, railway stations, ports

SECURITY GATES

Made to
measure.
Built to last.

Our range of security gates come as sliding, cantilever and swing entry options, each carefully engineered to exacting architectural specifications. These gates are designed to be equipped with automation and cope with the most demanding environments – welded and powder-coated aluminium construction provides long-lasting, rust-free use and year after year of secure service.
